SUMMARY

I am an eager and hardworking aspiring Front-End Developer with knowledge of HTML, CSS, JavaScript and Bootstrap. I can build websites and web apps UI using with a focus on user experience. I am excited to learn new skills and work on real-world projects. I am ready to contribute and grow as a developer.

PROJECTS

Project: Responsive Website Development

- Developed a fully responsive website using Bootstrap, ensuring seamless adaptability across mobile, tablet, and laptop devices.
- Implemented essential UI components, including navbars, footers, modals, cards, forms, and buttons, for enhanced user experience.

Project: Responsive Login Page

- Created an attractive and user-friendly interface allowing users to enter an email address and password. Implemented media queries to ensure adaptability across different screen sizes.

Project: E-Commerce Landing Page

- Focused on creating an attractive and visually appealing layout to enhance user experience. Designed and structured multiple sections, including product showcases, feature boxes, navbar, and footer.
